Ideo

Dear Ideo,

I am applying to this position, in the hopes of having the greatest work experience in my life. I love design, am very passionate about it, and I thoroughly enjoy working with others in the design process. My work ethic is unmatched. I enjoy balancing heavy workloads and being constantly busy.

I have developed necessary skills over a long period of time in multiple design fields, including Graphic Design, Web Design, Film and Editing, 2D animation, and I have also recently started becoming involved in iOS app design. I am well versed in most programs in the Adobe Creative Suite, HTML5, CSS, and web design frameworks such as Bootstrap and Flexbox. I have led and directed many group projects since highschool, including a few short films and a side scrolling video game. This past summer, I started an apparel company aimed at supporting underappreciated artists and giving them exposure. My website shows the best representation of my skills, and so is the best place to view my work along with my resume.

This internship is the most invaluable experience I could even dream to have. I look forward to being in contact in the future, and hope I can have further discussion as to why I would be a good fit this coming summer.

Sincerely Yours,

Daniel
